# Fertilizer Report—1948

## Introduction

All products intended for fertilizing purposes, except the dung of domestic animals, marl, lime, and wood ashes, shall be registered annually in accordance with the provisions of the Pennsylvania Fertilizer Law, Act of May 1, 1909, as amended.

Section 1 requires the following information to be shown on sacks or attached cards: (a) The number of pounds of fertilizer contained in the package; (b) the name, brand, or trade mark under which the fertilizer is sold; (c) the name and principal address of the manufacturer, importer, or other person putting the fertilizer on the market in this Commonwealth; (d) guarantee for nitrogen; (e) guarantee for total phosphoric acid, except in mixed or super-phosphate fertilizer; (f) guarantee for available phosphoric acid; (g) guarantee for potash soluble in distilled water.

Mixed fertilizer shall contain at least sixteen units of plant food based upon guarantees for nitrogen, available phosphoric acid, and water soluble potash, the guarantees to be stated in even units.

The Law requires that when the word "tobacco" is used as a part of the brand name, the potash content must be in a form other than chloride.

Applications for registration are submitted to each previous licensee toward the close of the calendar year. The application must show the preceding year's tonnage sales of each brand in order that license or registration fee can be properly computed. It must also show the names and number of brands to be sold during the ensuing year, and state the analysis of each one of such brands.

Agents of the Bureau of Foods and Chemistry are empowered to collect samples of commercial fertilizers, at which time reports providing full information for each sample are prepared. The samples and reports are forwarded direct to the Harrisburg Laboratory where an immediate check of the record is effected to determine the registration status. Analyses are then performed to ascertain whether the fertilizers conform to their guarantees.

During the year 1948, Agents of the Department collected 517 official samples. Of this number, a total of 506, representing 221 brands registered by 36 manufacturers, were subjected to analysis and classified as follows:

	<i>Brands</i>	<i>Samples</i>
Complete Fertilizers .....	171	408
Superphosphate Fertilizers .....	25	55
Rock and Potash Fertilizers .....	21	36
Miscellaneous Fertilizers .....	4	7

Totals .....	221	506

## Requirements for Registration According to Pennsylvania FERTILIZER LAW

Section 2. Each manufacturer or importer of commercial fertilizer . . . shall, on or before the first day of January of each year, or before offering them for sale in this Commonwealth, file annually with the Secretary of Agriculture a statement of the names and number of brands of such commercial fertilizers, having distinct trade-names, that he shall offer for sale during the next ensuing year, and a copy of the analysis of each one of such brands of commercial fertilizer . . .

Section 3. In addition . . . every manufacturer or importer of commercial fertilizers shall, on or before the first day of January of each year, or before offering them for sale in this Commonwealth, file annually with the Secretary of Agriculture an affidavit showing the amount of each brand of fertilizer, having a distinct trade-name, sold within the Commonwealth during the last preceding year; and if the said amount shall be one hundred and fifty tons or less, he or they shall pay or cause to be paid to the Secretary of Agriculture the sum of fifteen dollars for each and every brand of such commercial fertilizer, having a distinct trade-name, sold within the State during the last preceding year; and if the said amount shall exceed one hundred and fifty tons, and be not more than two hundred and fifty tons, he or they shall pay the sum of twenty dollars, as aforesaid; if the said amount shall exceed two hundred and fifty tons, and not more than four hundred tons, he or they shall pay the sum of thirty dollars; if the amount shall exceed four hundred tons, and not more than five hundred tons, he or they shall pay forty dollars; and if the amount shall exceed five hundred tons, he or they shall pay fifty dollars. If such manufacturer or manufacturers, importer or importers, shall not have made any sales within the Commonwealth during the preceding year, he or they shall pay the sum of fifteen dollars upon each such brand as aforesaid.

Section 5. Any person or persons selling, offering, or exposing for sale, any commercial fertilizer or any brand of the same, having a distinct trade-name, without the analysis required by section one of this act, or with an analysis stating that it contains a larger percentage of any one or more of the above-named constituents than is contained therein, or for the sale of which all the provisions of sections two and three have not been complied with, or any person violating any of the provisions of section four of this act, shall be guilty of a misdemeanor, and, on conviction, shall be sentenced to pay a fine of not less than twenty-five nor more than one hundred dollars for the first offense, and not less than two hundred dollars for each subsequent offense. . . .—*Act of May 1, 1909, P. L. 344 as amended.*

---

The Department of Agriculture, as the agency charged by the Legislature with enforcement of the provisions of the Fertilizer Law (copies of which are available upon request) insists upon strict compliance therewith.

## Brands Registered and Tonnage Sales

Licenses were issued to 107 Manufacturers to cover sales of their brands for the year 1948. These licenses included 615 brands of which 501 were mixed fertilizers and 114 so-called "base" materials such as nitrate of soda, sulphate of ammonia, bone, etc.

The 1948 applications for registration showed that 547,381 tons of all classes of fertilizers were sold during the year 1947 compared with 555,844 tons sold during 1946 and classified as follows: Complete Fertilizers, 454,389 tons; Ground Bone Fertilizers 869 tons; Superphosphate Fertilizers, 64,848 tons; Rock and Potash Fertilizers, 18,327 tons; and Miscellaneous Fertilizers as follows: Tankage, 863 tons; Nitrate of Soda, 333 tons; Potash Salts, 118 tons; Sulphate of Ammonia, 161 tons; and unclassified, 6,807 tons.

The 1947 tonnage figure reveals that there were supplied 24,782 tons of nitrogen, 98,092 tons of available phosphoric acid, and 41,744 tons of water soluble potash, or a total of 164,618 tons of plant food. The amount of plant food is 44,357 tons more than that supplied during the year 1946.

## Conclusions

Of the 506 official samples analyzed, 36 or 7.11 per cent were found to be deficient in one or more elements of plant food, to the extent of 0.2 per cent or more. The proportion of deficiencies is higher than that reported for the year 1947.

Considering the plant food elements separately, 9 samples or 1.78 per cent were found to be deficient in nitrogen, 9 or 1.78 per cent deficient in phosphoric acid, and 18 or 3.56 per cent deficient in water soluble potash.

Of the total number of fertilizers analyzed, 408 were complete fertilizers and 35 or 8.58 per cent were found to be deficient: 8 or 1.96 per cent deficient in nitrogen; 9 or 2.18 per cent in available phosphoric acid; 18 or 4.41 per cent in water soluble potash.

## Average Analyses and Retail Prices

The average unit values, estimated from the average retail selling prices, were as follows: Nitrogen \$3.89, Available Phosphoric Acid \$1.50, Water Soluble Potash \$1.68.

The average retail selling price for Complete Fertilizers in 1948 was \$46.31 a ton, compared with \$40.49 for 1947.

It is noted that 7.11 per cent of all samples collected during the year 1948 were found to be deficient, which deficiency is higher than the previous year's inspection. In most instances the deficiencies were balanced by overages in other elements. Where the deficiencies were found to be of serious nature, prosecutions were instituted.

## Key to Tables

The following tables include the results of analyses of the official samples. Each sample was given a chemist's number and analyzed for the element or elements guaranteed.

The Asterisk (\*) indicates those samples found to be deficient to the extent of 0.2 per cent or more.

TABLE I—Deficiencies.

TABLE II—Average Analysis and Retail Prices.

TABLE III—Complete Fertilizer, furnishing Nitrogen, Available Phosphoric Acid and Potash.

TABLE V—Superphosphate and Lime Phosphate Fertilizers furnishing Available Phosphoric Acid.

TABLE VI—Rock and Potash Fertilizers furnishing Available Phosphoric Acid and Potash.

TABLE VII—Miscellaneous Fertilizers.

TABLE I. DEFICIENCIES

CLASS OF FERTILIZERS	SAMPLES	NITROGEN	Number Deficient in	
			AVAILABLE PHOSPHORIC ACID	POTASH
